

European Commission LIFE Environment program co-financed project

"Adaptation of Water Framework Directive and Habitats Directive harmonization and integrated actions for freshwater quality improvement in Salaca river sub catchment"

(LIFE IS SALACA)

Grant agreement 101114155 — LIFE22-ENV-LV-LIFE IS SALACA

Deliverable D2.2. Annotation in English

" Action plan for implementation of conservation activities in demonstration areas "

Activity T.2.2 Preparatory work for riparian forest management

Author: SILAVA (Mārcis Saklaurs)

26.02.2025.

Summary

To improve the ecological functions of riparian forests, and implement the activity planned in the project "Establishment of demonstration areas", 25 ha of grey alder stands will be replaced by other tree species and different types of cutting will be performed in further 40 ha of the area in the Salaca sub catchment. The action plan describes the conservation activities in the demonstration areas, by detailing the tasks step-by-step. It includes contracts with forest owners, the necessary permits and documentation, marking of the stands, contracts with service providers, the works and their quality control, as well as data collection for evaluating the efficiency of the works.
